

FUSION TEE TESTING MACHINE

The Compression Fusion Tee Testing Machine “the Crusher” has been designed to test the integrity of the fusion between the service tee and the plastic pipe. The Crusher includes a Williams air over hydraulic pump with gauge, an adjustable safety arm above the Tee which prevents the Tee from flying out of the machine in the event it becomes unattached from the jaws, and a remote operator with a 6’ hose. This unit will test up to 8” Pipe. Larger units available upon request.

ONE MODEL TESTS UP TO 8” SERVICE TEES
